IMAPS International Conference on Alternative Energy

www.imaps.org/energy

*Albuquerque Embassy Suites Hotel & Spa
Albuquerque, New Mexico - USA*

January 16-18, 2007

Abstracts are being accepted until November 17th

The Energy Conference will be held at the Albuquerque Embassy Suites Hotel & Spa, Albuquerque, New Mexico; and is being sponsored by the International Microelectronics And Packaging Society (IMAPS). The Energy conference is a continuation of the past Fuel Cell Workshop and will also focus on this critical field that will be affecting every aspect of our lives worldwide. Core issues involve new technologies, materials and processes for renewable, non-renewable and innovative application of existing technologies. Incentives for research, investment and adoption are already practiced in some Asian and European countries. Following new energy policies in the US and other countries, these incentives are now available to encourage adoption, research and development of new technologies.

General Chair:

Roupen Keusseyan, DuPont

roupen.i.keusseyan@usa.dupont.com

Technical Chairs:

Dr. Xuan Wang, Intel

xuan.wang@intel.com

Keith Easler, Consultant

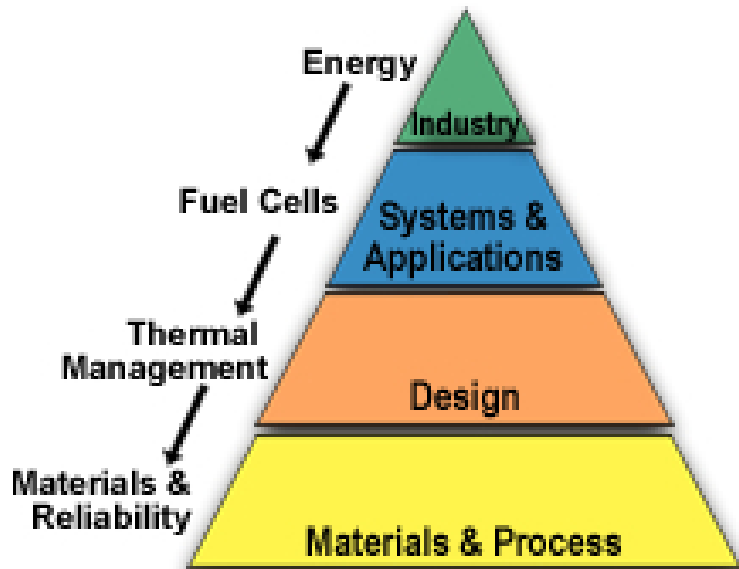

keasler@cox.net

Energy

Solar Energy (Photovoltaics)
BioFuels and Energy from Waste
Fuel Cells
Wind Energy
Batteries and Hybrids

Thermal and Power Management
Environmental Regulations
Design for Efficiency

Materials & Reliability
Qualification Approaches
RoHS Compliance & Regulations
Outsourcing Issues
Government Policies

Those wishing to present a paper at the Energy Conference, must submit a 250-300 word abstract electronically by November 17, 2006, using the on-line submittal form at: www.imaps.org/abstracts.htm. If you need assistance with the on-line submission form, please email Jackki Morris-Joyner (jmorris@imaps.org) or call 305-382-8433.

All abstracts submitted must represent original, previously unpublished work. The abstracts should highlight the industry, application area, design, and process/material, the submission section will aid in grouping the work within the four areas.

No formal technical paper is required. A reproduction-ready one- to six-page concise summary with text (figures and graphs included if necessary) will be required for the abstract booklet on December 15, 2006. A post-conference CD containing the full presentation material as supplied by authors will be distributed to all attendees. **All speakers are required to pay a reduced registration fee.**
