Advanced Technology Workshop on Printed Devices and Applications

The objective of the Printed Devices Workshop is to provide a unique forum that brings together scientists, engineers, manufacturing, academia, and business people from around the world who work in the area of printed electronics as an emerging packaging technology. This workshop enables discussion and presentations on the latest materials, process, design & emerging applications of printed electronics technology.

More Exposure for Exhibitors

All tabletop exhibits will be located in the session room. Beginning with lunch on Tuesday and through the day on Wednesday, Exhibitors will not only have the advantage of hearing the sessions, but they will have additional exposure to the attendees. In addition, exhibiting companies will be given 3 minutes of mic time during the session breaks to talk about their products and services to the attendees.

Marketing Feature Available for Exhibitors

IMAPS offers all exhibitors the option of providing an unlimited amount of pages of company products, services and contact information to be included in the Technical Presentations CD-ROM. These CD-ROMs are provided to all technical conference attendees and are for sale through IMAPS to all industry professionals.

This new and unique feature will promote an unlimited amount of promotional material for the Exhibitor's products and abilities much longer than just the Conference. **There is no charge for this optional feature, but the deadline is firm.**

Submissions must be sent electronically in one (1) file, either PDF or Word, that is easy to open, not password-protected and in a logical format. Any materials not sent in the required format or that arrive after the deadline, may not appear on the CD-ROM. Send files to abell@imaps.org on or before April 12, 2010.
